3 Introduction

FAA MedXPress is managed by the Office of Aerospace Medicine (OAM). OAM is responsible for a broad range of medical programs and services both the domestic and international aviation communities. Services provided by the OAM include:

- Medical clearance of air traffic control specialist and other FAA employees required to meet medical standards to perform safety-sensitive duties
- Pilot medical certification

As such, OAM has the responsibility for collecting and maintaining any information related to the medical conditions of pilots and certain covered positions within the FAA.

All airmen, air traffic controllers (ATCs) and certain other designated FAA employees are required to have FAA Medical Certificates or Clearance. The process of applying for an FAA Medical Certificate or Clearance requires completion of the OMB-approved, FAA Medical History Form 8500-8, and performance of a medical examination of the applicant by an FAA-designated Aviation Medical Examiner (AME). The AME is a private physician who is approved by the FAA to perform this function.

FAA MedXPress allows applicants to complete and submit their FAA Form 8500-8 on-line. FAA MedXPress securely transmits the completed form and makes it available to a designated AME to review at the time of the applicant’s medical examination.

Individual traffic arrests and/or convictions are not required to be reported if they did not involve: alcohol or a drug; suspension, revocation, cancellation, or denial of driving privileges; or attendance at an educational or rehabilitation program. If “yes” is checked, a description of the arrest(s), and/or conviction(s), and/or administrative action(s) must be given in the EXPLANATIONS box.
